

**cse software inc.**

WE BUILD SOLUTIONS THAT DRIVE RESULTS  
IN TODAY'S DIGITAL LANDSCAPE

CSE Software® is a privately held company founded in 1990. CSE has been developing software, hardware and creating technology solutions for more than 30 years. CSE has experience in multiple industries, including government, military, healthcare, construction, agriculture, mining and more. Co-owners Lara Aaron and Renee Gorrell are heavily involved in the day-to-day running of the certified women-owned small business.

CSE Software offers custom software, simulation, AR/VR, mobile and web development; and help desk support.

CSE employs approximately 75 people.

## 10 Reasons Why We Are Different

- 30 Years of experience.
- Owner longevity. Both owners active in the day-to-day running of the company
- Full service IT company: Design, develop, test, deploy and support software.
- Experienced development team with an average tenure of 15 years.
- Passionate US-based developers continuously contributing to our R&D efforts.
- 11 years of experience developing, training, and supporting our simulation products.
- 24x7 live answer help desk support.
- Projects are built scalable to grow as your organization grows.
- Proven process of working with subject-matter-experts to ensure accurate simulations.
- Diverse client base of government and Fortune 500 companies.

The following technologies are a snapshot of the development tools we use. Our teams continually learn new tools that provide development options to our clients.
